

ACS Program

Business Intelligence Analyst (LEA,DK)

24 months
1350 hours
Courses: 1065 hours
Internship (1): 285 hours

Following the achievement of the objectives set within the program framework and upon the completion of all courses, including the internship, the student will obtain an Attestation of College Studies (ACS) recognized by the Quebec Ministry of Higher Education.

The Business Intelligence Analyst program will prepare you for:

- Performing analysis using powerful Tools (Oracle and Microsoft) as well as modeling complex, efficient reports and decision-making dashboards adapted to the employer's expectations.

Employment prospects: Consulting firms, information technology companies, government, etc.

Leading to an ACS, graduates will be able to perform tasks such as:

- Analyzing organizational and environmental data in order to make strategic decisions within the company
- Specifying the requirements of a data warehouse
- Modeling, designing, building and administering a data warehouse
- Providing management, statistics and analysis reports to those in charge of his business

Skills

The skills have been adequately selected to reflect the demands and expectations of employers. Graduates will therefore be able to perform the tasks required in the workplace. In addition, the program follows a logical learning curve starting from basic theoretical notions while progressing towards practical applications, including an internship.
